

# Cara Mengecek/Repair Database pada cPanel

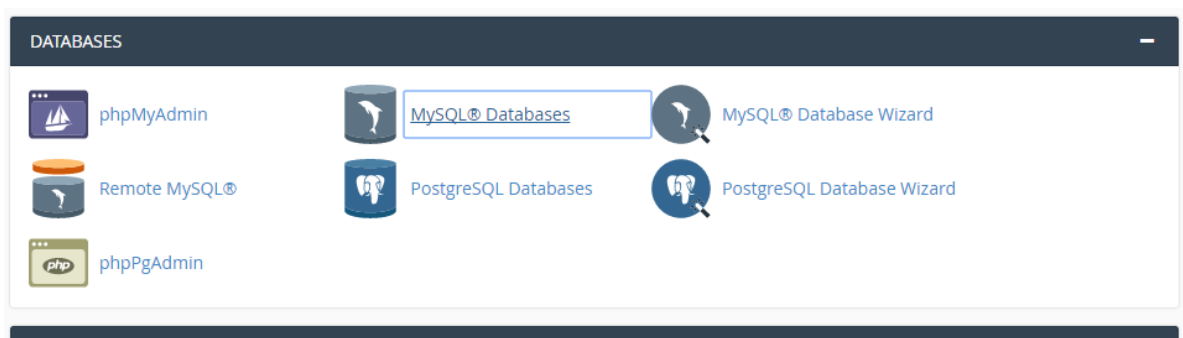

Database pada hosting anda ada yang error, atau anda ingin hanya sebatas mengecek apakah database anda dalam keadaan baik-baik saja, pada tutorial kali ini akan di kasih tahu cara untuk melakukan pengecek atau repair database yang ada di cpanel.

Berikut langkah-langkahnya:

1. Untuk langkah pertama, sudah jelas anda harus melakukan login ke cPanel anda agar anda bisa mengakses menu-menu di cPanel anda. □

2. Lalu klik menu MySQL Database.

3. Lalu akan muncul dari halaman MySQL Database, untuk melakukan pengecekan atau repair database, pada Modify Databases :

The screenshot shows the MySQL Database interface. It has three main sections: 'Create New Database' with a text input field and a 'Create Database' button; 'Modify Databases' with a 'Check Database' dropdown menu and a 'Check Database' button, and a 'Repair Database' dropdown menu and a 'Repair Database' button; and 'Current Databases' with a search input field and a 'Go' button. Below the search field is a table with columns: Database, Size, Privileged Users, and Actions. The table contains one entry for a database named '\_wp722' with a size of 1.52 MB, a privileged user, and actions for 'Rename' and 'Delete'.

4. Untuk mengecek database anda, silahkan anda pilih database yang akan anda check, lalu klik tombol "Check the Database". Jika database anda baik-baik saja atau tidak error, maka report yang di hasilkan bisa di lihat pada gambar berikut :

The screenshot shows the 'Checking Database' report. It starts with the text 'Database " \_wp722" is now being checked.' followed by a list of database tables and their status. The status for all tables is 'OK'.

```
[ _wp722.wp3q_2_commentmeta] status: OK
[ _wp722.wp3q_2_comments] status: OK
[ _wp722.wp3q_2_links] status: OK
[ _wp722.wp3q_2_options] status: OK
[ _wp722.wp3q_2_postmeta] status: OK
[ _wp722.wp3q_2_posts] status: OK
[ _wp722.wp3q_2_term_relationships] status: OK
[ _wp722.wp3q_2_term_taxonomy] status: OK
[ _wp722.wp3q_2_termmeta] status: OK
[ _wp722.wp3q_2_terms] status: OK
[ _wp722.wp3q_3_commentmeta] status: OK
[ wp722.wp3a 3 comments] status: OK
```

lalu jika terdapat error atau warning pada gambar di bawah anda harus melakukan repair.

```
_aban384.ab_settings] status: OK
_aban384.ab_stock_statuses] status: OK
_aban384.ab_store_descriptions] status: OK
_aban384.ab_stores] warning: Found row where the auto_increment column has the value 0
_aban384.ab_stores] status: OK
_aban384.ab_task_details] status: OK
_aban384.ab_task_steps] status: OK
```

5. Untuk repair database anda jika terdapat error atau warning pada saat pengecekan, pilih database yang terdapat error atau warning, lalu klik tombol Repair the Database.

**DONE!**
